

Almirall is an international pharmaceutical company based on innovation and committed to health, headquartered in Barcelona, Spain. The company researches, develops, produces and markets proprietary R&D medicines and those under licence with the aim of improving people's health and wellbeing.

Almirall's research is focused in the discovery of novel therapeutics for the treatment of diseases with an inflammation component such as: asthma, COPD, rheumatoid arthritis, multiple sclerosis, psoriasis and dermatology in general.

The specific expertise in predictive toxicology and exploratory clinical trials is regarded an asset for the related work packages.
