

Interface Europe is built around former EC officers, Senior scientists and experienced R&D project managers and provides Knowledge Intensive Research Services to support both technology providers (researchers) and technology users (public authorities, civil society, companies, investors). Interface Europe is involved in the support of both public and private coordinators of European programmes funded projects (FP7, Eureka, IMI) in the field of Health and Biotechnology.

Expertise of Interface Europe falls into the field of scientific design and implementation of R&D projects, technology road mapping, specialised assistance on technological watch and marketing, scientific assessment and monitoring, quality and risk assessment, management of complex collaborative projects, legal and financial support, intellectual property management, internal communication and knowledge sharing (Collaborative platform), external communication (strategy and website), etc...
