

Novartis Pharma AG is a multinational pharmaceutical company based in Basel, Switzerland with approximately 100 000 associates in 140 countries worldwide. Novartis focuses on discovering, developing and successfully marketing innovative products to prevent and cure diseases, to ease suffering and to enhance the quality of life.

The products are concentrated in major therapeutic areas: Cardiovascular and Metabolism, Oncology and Hematology, Neuroscience and Ophthalmics, Respiratory, Immunology and Infectious Diseases.

Novartis is also committed to innovative research and development of new tools for drug development, and participates in collaborative research projects with other industrial and academic partners. For example Novartis actively participates in a number of consortia and public private partnerships under the Critical Path Initiative or in the European InnoMed PredTox program for non-clinical safety assessment. Novartis brings its experience from these partnerships into the project and coordinates with these initiatives and other relevant IMI projects.
